Ten Science Quest Books Now I Can Read!

"A Drop of Water"
By Gordon Morrison
J 508 MOR

A drop of water falls from a child's fingertip to the ground. Learn about its journey through the water cycle as it flows over and under.

"A Seed is Sleepy"
By Dianna Aston
J 581.4 AST

Seeds are much more complex than the typical description given to a child. Discover the world of seeds as they go from sleep to blooming wonder.

"Phases of the Moon"
By Gillia Olson
J 523.3 OLS

Have you ever wondered why the moon changes shape over time? Now you can learn what each phase of the moon is called as well as why it happens. A simple layout with large color pictures.

"Autumn Leaves"
By Ken Robbins
J 581.4 ROB

Take a close photographic look at thirteen different types of trees and the leaves they produce. Why do leaves change color in the fall? Do you want to see all of the different colors they can become?

"I Face the Wind"
By Vicki Cobb
J 551.518 COB

Vicki Cobb makes science fun! Why does the wind blow? Why can't you see the wind? Cobb digs into the science behind wind, making it a breeze to learn about. Hands-on activities that will blow you away!

"Actual Size"
By Steve Jenkins
J 591.41 JEN

Sometimes it is difficult to tell from a picture how big or small an animal really is. And sometimes it is difficult to find one in real life. So Steve Jenkins illustrates them in their actual size!

"Digging Up Dinosaurs"
By Alik
J 567.91 ALI

Dinosaurs lived long ago. When people started finding fossils, they wondered what these strange creatures were. Learn more about how the dinosaurs lived and how their bones turned into fossils.

"Animal Mouths"
By Mary Holland
J 591.44 HOL / Arbordale

One animal doesn't have a mouth at all. Another has sharp jaws. Birds use their beaks instead of teeth. Learn about all different types of animal mouths and how they eat. Or don't eat!

"Who Eats What?"
By Patricia Lauber
J 574.5 LAU

Explains through simple text and clear diagrams how food chains work. In the wild, different animals eat different things. This is how they're all connected.

"The Fruits We Eat"
By Gail Gibbons
J 634 GIB

A companion to *The Vegetables We Eat*, Gibbons returns with this yummy book. All of your favorite fruits are inside!
